ABOUT ME

I'm a 28 Java software engineer from Italy (TV).
Being a determined professional, I try every day to develop new skills and enhance my current abilities in this field. Passion and curiosity drive me to increase my knowledge about computer science: I wish to embrace emerging technology and stay on top of trends.
The dedication to my field leads me to share what I learn and to bring my unique perspectives to collaborative teams, in order to solve problems in a creative and strategic way and achieve the set objectives.
Teamwork is one of my greatest strength: I think that great achievements are the product of great collaborations and team effort. Actually, I believe that building relationships and nurturing them is important to grow both professionally and personally.
