About Me

I'm a 30 software engineer from Italy (TV).
Being a determined professional, I try every day to develop new skills and enhance my current abilities in this field.
Passion and curiosity drive me to increase my knowledge about computer science: I wish to embrace emerging technology and stay on top of trends.
The dedication to my field leads me to share what I learn and to bring my unique perspectives to collaborative teams, in order to solve problems in a creative and strategic way and achieve the set objectives.
Teamwork is one of my greatest strength: I think that great achievements are the product of great collaborations and team effort. Actually, I believe that building relationships and nurturing them is important to grow both professionally and personally.
Education

- **Uninettuno Telematic University** *(2020-present)*

    Undergraduate Bachelor's degree

    Computer Engineering

- **I.T.S Luigi Einaudi**

    Secondary School Diploma

Work Experiences

- **Gruppo Euris Spa - Padua**
 01/11/2018 – present

Team Leader & Software Engineer (from Nov-2022)

- ✓ I am the Team leader of a small-sized team (1 to 3 members), managing and distributing tasks within it, defining the architecture and the goals of our backend components.
 I like reviewing code and reduce software complexity, to achive the best readability and performance of our programs.

Technical Interviewer (from 2022)

- ✓ Evaluation and management of the entire technical interview process for the java opened positions, from the program test correction to the face-to-face tech screening.

Java tutor (from November 2021)

- ✓ Be able to tutor and manage new java junior engineers, from helping them settle into teaching them new technologies, based on the projects requirements that they are involved

Software Engineer (from Nov-2018)

- ✓ As a Software Engineer, my role is to build and test web applications using Java and all the framework and technologies selected to compose the software architecture, such as Spring, Hibernate, Jenkins, Docker and so on
